- Improve management control and reduce errors
- Faster check clearing allows you to act sooner on returned checks
- Streamline cash flow from remote locations by consolidating funds into one bank

Deposit Connect

It's like having a bank teller right in your office!

Why Choose Macatawa Bank's Deposit Connect?

If your company handles a large volume of checks or makes frequent trips to an out of the way bank location, consider Macatawa Bank's Deposit Connect. Deposit Connect allows employees to save time preparing and making deposits by scanning and converting checks into electronic deposits. Deposit Connect also allows you to streamline your cash flow by consolidating deposits from multiple locations into a single bank. In addition, it can help reduce the risk of check fraud by allowing you to act sooner on returned checks, significantly increasing your opportunities for collection.

Product Description

Macatawa Bank's Deposit Connect uses a desktop check scanner that allows you to make deposits electronically by converting images of personal checks, corporate checks, and money orders into an electronic transaction that is sent directly to the bank through a secure connection. Managers within your company have the ability to set the degree of approval required for deposits. You can then save deposit images to your computer for simple and secure record keeping.

How it works

Deposit Connect is easy to set up and use. Using your desktop check scanner, simply load your checks into the hopper and scan both sides of the check in a single pass. The check scanner creates an electronic image that you can view right from your PC. The dollar amounts for the checks are automatically read and the deposit amount is totaled for you. After reviewing, simply click "submit deposit," and the deposit is sent to Macatawa Bank through a secure Internet connection.

Your company can enjoy the convenience of sending single or multiple deposits daily. View your transactions online and funds will be available the following business day.
